I have every winter been repeatedly asked by several of our citizens what number of Medical Students are attending lectures in the University. I have never been able to give a definite answer to the question because I was unable to ascertain the number. Last winter with all my exertions I was only able to record one hundred & fifty odd names of students belonging to the class altho many young gentlemen of that class told me that they were of opinion there were three hundred in the class. — Some that I conversed with estimated the class lower than two hundred & ninety. From the frequent opportunities that I had of viewing the class assembled I formed the opinion that the class contained between two hundred & eighty & two hundred & ninety. —

This Session with all my exertions I was only able to record the names of one hundred & thirty Students. It seemed to me that by putting up a roller in the Hall of the University requesting the Students to call upon the Janitor & record their names upon a sheet of paper left with him for that purpose that I might have better success in obtaining the number of the class of this Session. — I adopted that plan & have recorded one hundred & ninety five names which I am of opinion is a correct list of the number of Medical Students attending lectures in the University this Session —
